

## Emergency Medication Delivery Flow Chart

We provide this after-hours service free of charge when a newly prescribed schedule 4 or schedule 8 medication is requested by the doctor and the item is not on the list of emergency stock to be held at the RACF. When the required medication is not schedule 4 or 8, or is usually available in the Facility emergency supply, and is requested for emergency supply then an emergency access fee will be charged. The pharmacy should be notified, by the facility, within 1 hour of the prescriber authorising the supply of medication for it to be classified as an after-hours free emergency supply.
